

# FREMONT COUNTY BUILDING DEPARTMENT

2006 Building Codes

## SOLAR SUBMITTAL REQUIREMENTS

All solar installations (ground, pole or roof mount) require the following submittal documentation:

- A copy of a recorded deed
- A detailed plot plan
- A copy of the engineering and installation contract
- Construction/Design details
- If a battery storage system is proposed, additional information is required

Permit fees are as follows:

Residential Installation	\$172.00
Commercial Installation	\$214.00

(Colorado Revised Statutes currently exempt solar installations from use tax assessment.)

All ground and pole mount installations are reviewed by the Department of Planning and Zoning; roof mounts are not subject to review by Planning and Zoning.

## INSPECTIONS:

Pole Mounted:

1. Post Holes/Foundation Inspection (prior to panel installation)
2. Approved Final Electrical Inspection
3. Building Department Final Inspection

Roof Mounted:

1. Anchor Inspection (prior to panel installation)
2. Approved Final Electrical Inspection
3. Building Department Final Inspection

Wind Turbine:

1. Post Holes/Foundation Inspection (prior to panel installation)
2. Approved Final Electrical Inspection
3. Building Department Final Inspection

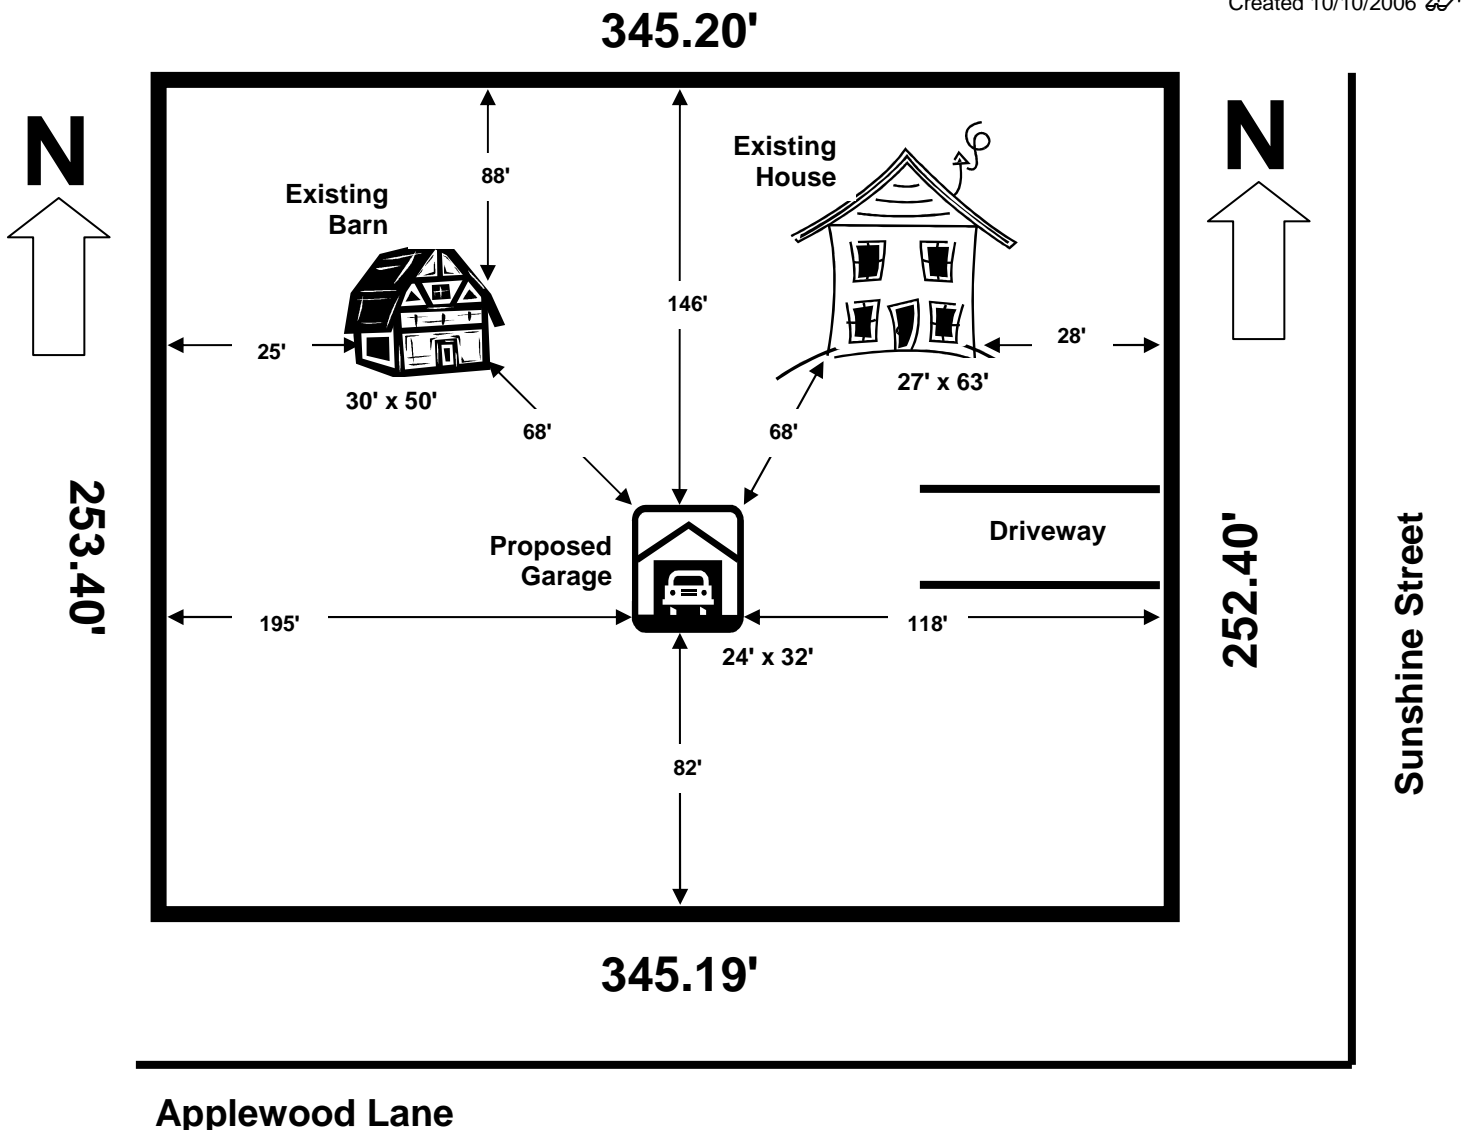

# Sample

## Plot Plan

Plot Plan: May be prepared by applicant and must contain the following:

1. Configuration of lot and all property dimensions.
2. Location on lot and dimensions of all structures. Identify each structure as "existing" or "proposed."
3. Setback distances from proposed structures to all property lines and to any existing buildings.
4. Location and name of any public or private roads which adjoin or trespass property.
5. Location that driveway enters property from public or private road. Driveway will determine "front" of property.
6. North arrow.
