RE: Zephyr Gold USA, Ltd.
Conditional Use Permit (CUP) 12-003
Request for Extension

Dear Mr. Koch,

Zephyr Gold USA, Ltd., (Zephyr) respectfully requests a three (3) year extension of CUP 12-003 from February 26, 2019 to February 26, 2022.

Exploration to date includes three core drilling exploration events and two trenching investigations for geochemical data. The core holes are plugged and abandonment reports submitted to Colorado Division of Reclamation, Mining and Safety (DRMS) upon completion. Trenches are graded and reclaimed after receipt of analytical data when gold mineralization is not encountered.

DRMS holds a reclamation bond of \$92,655 for up to 7.8 acres of disturbance. Current disturbance is 4.89 acres including 7,078 ft. of exploration road. Zephyr has submitted three modifications to the DRMS Notice of Intent to Conduct Prospecting as core and geochemical results have guided exploration. DRMS performs annual inspections. Of the 593 acres in the CUP boundary, less than 1% has been disturbed and 1.3% is bonded.

Since approval of CUP 12-003 in February of 2013, core drilling exploration has occurred approximately 250 days and surface geology exploration has occurred an additional 100 days.
