Observed Violations:

8- Hands clean & properly washed

OBSERVATION: **(CORRECTED DURING INSPECTION)**

Priority

2-301.12: Cleaning Procedure (P)

Inspector Comments:

Employee failed to use proper cleaning procedure for hands. Observed employee add soap to hands, lather, and than turn the water on to rinse hands. Employee also used bare hands to touch handles to turn water off and dispense paper towels. Proper hand washing procedure is to rinse hands under running warm water, apply soap, rub hands vigorously 10-15 seconds, thoroughly rinse under running water and immediately following use paper towels to dry hands. To avoid re-contaminating hands, use paper towels when touching surfaces such as manually operated faucet handles. Proper handwashing- personal hygiene is directly related to preventing foodborne illness.

15- Food separated and protected

OBSERVATION: **(CORRECTED DURING INSPECTION)**

Priority

3-304.15(A): Gloves, Use Limitation (P)

3-302.11: Packaged and Unpackaged Food-Separation (P)

Inspector Comments:

Raw bacon above ready to eat items. This was moved during inspection. Per GM bacon is not kept in this refrigerator regularly.

Gloves shall be used for only one task and discarded when damaged or soiled, or when interruption occurs. Observed employee touch clothes with gloved hands and not discard gloves.

General Comments and Notes

Adequate sanitizer concentration measured, 200 ppm quat.

Premises maintained items marked on previous reports have been corrected.

BK has employee handwashing procedure videos, I would suggest that new employees watch these videos more often or try some other training methods to instill proper procedures into their routine.
